

Math 7 Period _____
7.3.9 Homework Set

Name _____
Date _____

1. A circle with a 12 inch diameter is folded in half and then folded in half again. What is the area of the resulting shape? Express your answer in terms of π .
2. Find the area of the shaded region. Round to the nearest whole number.

3. The face of a clock has a circumference of 63 in.
 - A. What is the radius of the clock?
 - B. What is the area of the face of the clock? Round to the tenths place.

4. Which of these pairs of quantities are proportional to each other? For the quantities that are proportional, what is the constant of proportionality?
- Radius and diameter of a circle
 - Radius and circumference of a circle
 - Radius and area of a circle
 - Diameter and circumference of a circle
 - Diameter and area of a circle
- (from Unit 3, Lesson 7)

5. Elena and Jada both read at a constant rate, but Elena reads more slowly. For every 4 pages that Elena can read, Jada can read 5.

pages read by Elena	pages read by Jada
4	5
1	
9	
s	
	15
	j

- Complete the table.
 - Here is an equation for the table: $j = 1.25e$. What does the 1.25 mean?
- C. Write an equation for this relationship that starts $e =$
(from Unit 2, Lesson 5)
